SpindleWich comes with Hubs and Tires. SpindleWich uses our patented Twist and Lock Tri-Lug rated at 20,000 lbs.

The largest spindles we know of are 3,500 lbs/spindle (7,000 axle)(14,000 container) If we can find a bigger spindle we could attach Tractor Wheels.

To achieve higher capacity, we then offer Tri60 axles (Tri-Lugs, Tri60, Tri-Coupler) with Ridged Pneumatic Casters aka "RidgeWich" up to 67,200 lb containers

SwivelWich is reason TriWich is on the map. After spinning a 40ft container on SAND, the US military contacted us.

HitchWich, V-Wich, CaddyWich and LiftWich were all developed within 1 year and with 100% Customer Satisfaction

TriWich Tri60 Solutions are based on your application. We have narrowed it down to 3 simple questions:

(See Caster Pricing for Tri60/Caster Options)

Capacity: What is the capacity of your application? Is the container empty or full? If full, how heavy? (See Standard Heavy Duty Casters below)

Off-Road: Are you working over Gravel, Broken Concrete, Dirt, Sand, or Snow? (See "AirWich" Pneumatic Casters below)

Equipment: How do you plan to move your container? Forklift, Tractor, Truck (Payload), Semi-Truck (Payload), Caddy (we do offer AirCraft Caddies for 80,000 containers)

Once you picked out the casters for your application, then you will know which Tri60 Tri-Coupler Axles System you need . . . Need help CS@TriWich.com / 909-582-9591
